## Quality Types Of Saffron

### 1 Cut Filament Grade A+ (Extra Super Nagin Grade A+):

Extra Super Nagin saffron is premium saffron composed of the thickest threads without style. 105-115 kg of saffron flowers produce 1 kilogram of Extra Super Nagin Saffron.

1

### 2 Cut Filament Grade A+ (Super Nagin Grade A+):

2

Super Nagin Saffron is the most significant amount of Afghanistan saffron exported annually. Super Nagin Saffron is pure saffron composed of threads without style. 105-115 kg

### 3 Cut Filament Grade B (Nagin):

Nagin Saffron is longer and thicker than common saffron. It is pure and contains stigma without the style. Nagin Saffron has no style & pollen and just consists of red parts of stigma with high strength of coloring and aroma.

3

### 4 Filament Grade A (Pushal Grade A):

4

Pushal Saffron contains threads with 2 – 3 mm style. The presence of style (white or yellow part) gives a great fragrance and its coloring power is about 220 to 260 USP.

### 5 Filament Grade B (Pushal Grade B):

Pushal Saffron contains threads with 2 – 3 mm style. The presence of style (white or yellow part) gives a great fragrance and its coloring power is about 205 to 235 USP.

5

### 6 Broken (Maida)

6

Broken (Maida) Saffron contains broken threads with 2 – 3 mm style, including old and new crops. Coloring power is about 180 to 235 USP. Saffron is very sensitive to moisture. Broken (Maida) : 100, 500, 1000 gr 1 gr. = 0.00220 lb (Pound) & 1 gr. = 2.204623e-5 sh cwt

### 7 White Root (Style)

White saffron or style, so called Konj, is the lower whitish part of a saffron thread. White saffron is the root of saffron threads, which has some health benefits. White saffron contains many properties as the nutritious substances are transferred to stigmas through white saffron.

7

## Rayan Saffron Company Export:

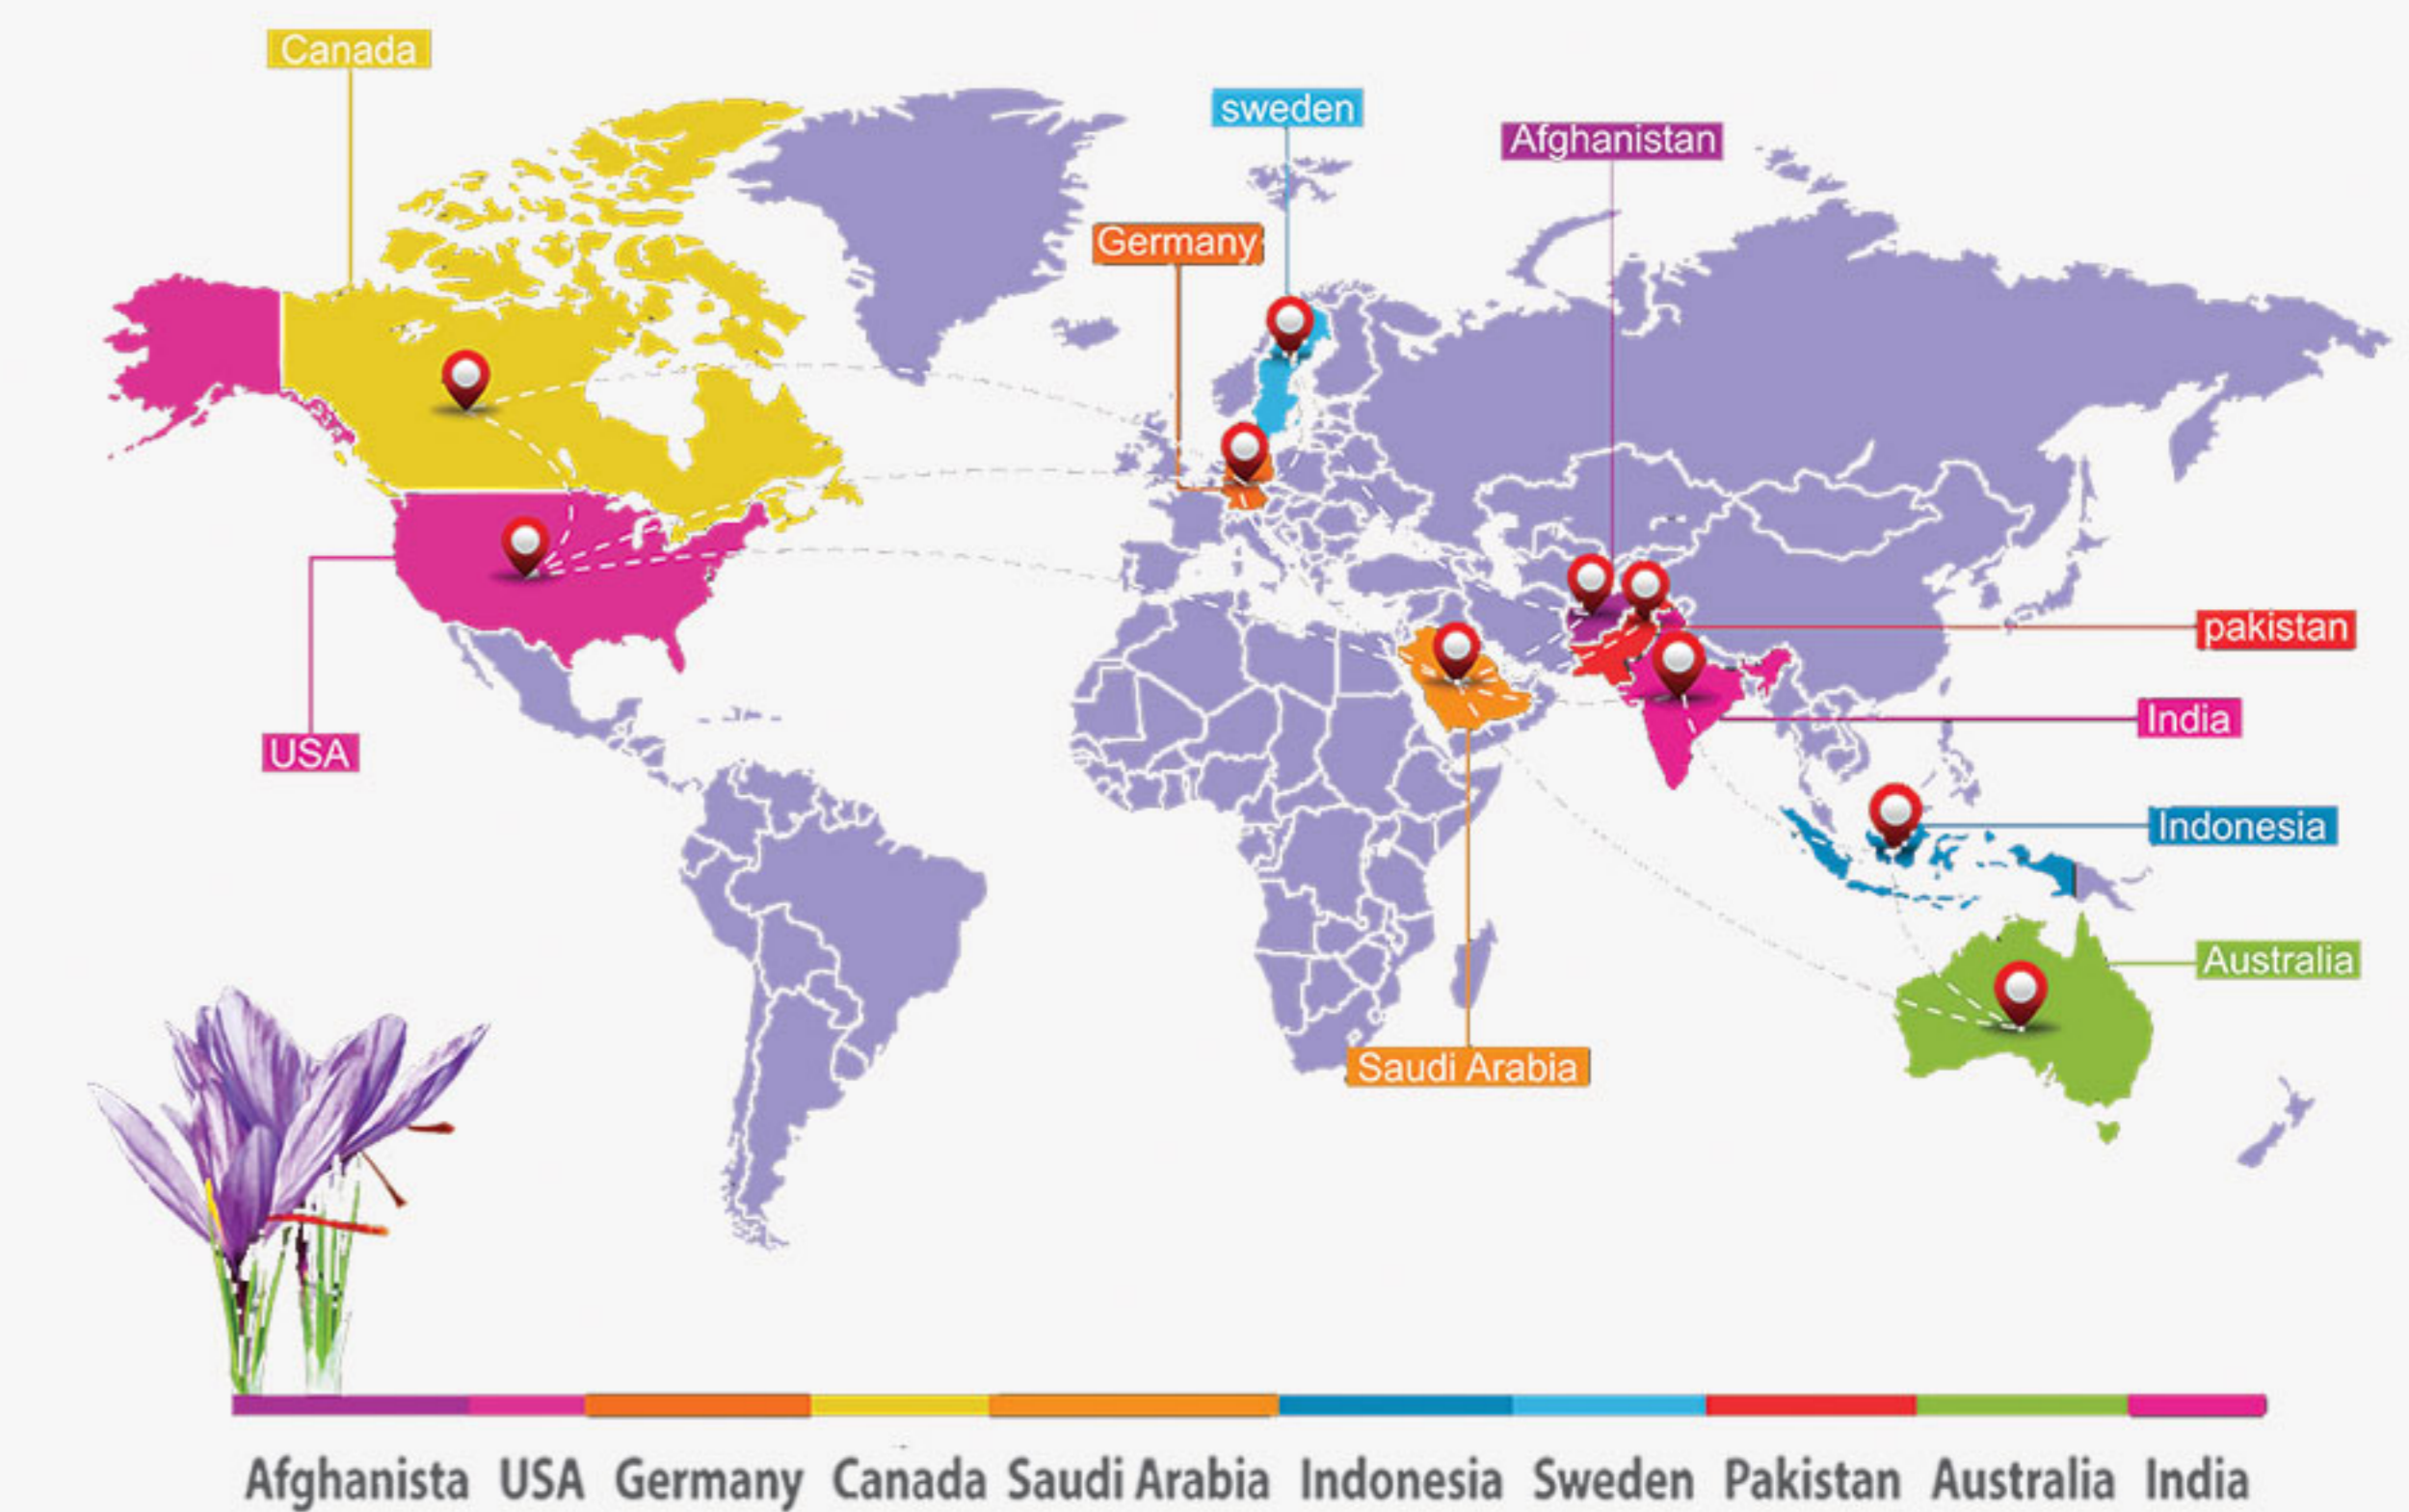

Rayan Herat Saffron has a worldwide presence and exports all around the world. Our goals are to meet customers' needs in the fastest and smoothest way. Rayan Herat Saffron produces, processing, and packs according to international standards and supplies saffron to global markets. Consistency in quality and provision of large orders are two of the vital factor of our success in international markets.

## FDA:

It's been three years since our company registered in the United States of America with US FDA **REG #:** 13286924580.

We often did export to our customers in the United States with FDA facilitation export services. Our saffron products could pass FDA laboratory tests every import time in the USA. One of our key points is that our products could give FDA laboratory smoothly and our US customers are delighted with our US.FDA certification.

## Presence in the international markets

Afghanistan USA Germany Canada Saudi Arabia Indonesia Sweden Pakistan Australia India

## Uses of Saffron

The three stigmas of the saffron flower are the most important economic part of the plant. The saffron stigma is rich in aroma and color. In dried or powdered forms, stigmas are commonly used as:

- spice or coloring in food preparation
- materials in pharmaceutical, cosmetic, and perfume industries
- dye material in textile production
- Saffron's anti-cancer effects have been studied extensively in recent years.
